

THE INNOVATION JAM WORKSHOP AND CONFERENCE

INNOVATE AND CELEBRATE THE 25TH ANNIVERSARY OF JAKARTA-BERLIN SISTER CITY COOPERATION

How can innovation contribute to a citizen centric city and enhance Smart City services of municipalities?

How can local and international collaboration support urban innovation?

OBJECTIVES

- Our aim is to facilitate the exchange between governments, private sector, and its German and Asian counterparts in a guided and creative process.
- Besides keynote presentations from experts and panel discussion, participants will engage in a concrete ideation process that will lead to executable results and creative solutions.
- Support the sister cities of Jakarta and Berlin with ideas and solutions and find ways to collaborate on projects.
- Network and get connected to innovators in a creative and fun atmosphere.

TOPICS

Meet and discuss with experts from Asia and Europe on how to address the following topics:

- Smart City Innovation and Collaboration: Open Data, AI, and other methods
- The Future of Urban Mobility
- Innovate 4 Good: Impactful and Sustainable Urban Innovation

ATTENDEES

- Founders and entrepreneurs from Asia and Europe
- Government Representatives from Jakarta and Berlin including Smart City experts
- Experts on urban innovation topics such as smart city, mobility, environmental and low carbon solutions, data science
- Investors and VCs
- Corporate innovation specialists
- Creatives and freelancers from the fields of design, IT and media
- International donor organizations

BACKGROUND

This year, Jakarta and Berlin are celebrating the 25th anniversary of their special partnership. Jakarta Smart City together with StartUp AsiaBerlin are going to host The Good Times 2019 to serve as a platform for entrepreneurship and ideas. The aim is to create ideas and to collaborate on implementable solutions for the cities. The event will also provide an overview of current developments and opportunities, and is an effective forum for sharing experiences and good practices in managing the implementation of urban innovation.

Jakarta Smart City is based on six pillars, which are smart governance, smart people, smart mobility, smart economy, smart living, and smart environment. As part of the cities digitization process, the city of Jakarta promotes Smart City engagement, Innovation, e-Government Services, IT entrepreneurship and private sector cooperation. The goal of Jakarta Smart City is to provide and improve internal and external digital solutions for government task and processes.

Berlin is not only one of the most attractive business hubs in Germany; it is also a laboratory for efficient infrastructure, informational networking, sustainable mobility, creativity and combining high productivity with high quality of life. Berlin, in particular, has become a noteworthy example of how a true "Smart City" operates in the world. Smart City Berlin is the integrated approach to all the future topics which the city will be dealing with in the decades to come. It is about anticipating trends and developments in all areas that affect life in a city. The idea is to use ICT and innovation to develop concrete solutions to make the city more efficient, healthier, more sustainable, more livable and cleaner.

We would like to invite you to join our workshop this year and explore interesting collaboration opportunities in Jakarta and beyond! Our platform will further assist you in creating valuable output and implementing projects afterwards.
