

Zukunftsort Berlin-Buch

Berlin-Buch is an internationally renowned science, medicine, and technology location in the northeast of Berlin. Around 6,500 people in the healthcare industry work at this location. At its heart is the 32 ha Campus Berlin-Buch, which houses excellent research institutes and one of the largest biotech parks in Germany. With its clear focus on biomedicine, it offers outstanding innovation and growth potential. The clinics on-site ideally complement the work being done here.

Industries: Medicine & Healthcare, Life Sciences & Biotechnology

Campus Berlin-Buch

Excellence in science and research

- International campus with around 3,000 employees from 70 nations, including 1,200 scientists
- Unique patient-orientated basic research in molecular medicine and molecular pharmacology
- The Max Delbrück Center for Molecular Medicine in the Helmholtz Association (MDC) is one of the top 20 life science research institutions worldwide. The internationally renowned Leibniz Research Institute for Molecular Pharmacology (FMP) is the only non-university institution in Germany working in pharmaceuticals research.
- Close cooperation with hospitals and outpatient clinics of the Charité University Hospital and the Berlin Institute of Health (BIH), training of natural scientists and doctors in translational medicine
- State-of-the-art technology platforms for genomics, proteomics, and metabolomics, ultra-high-field MRIs, advanced light microscopy, NMR spectroscopy, and a screening unit for drug discovery including medicinal chemistry

Innovations in biotechnology and medical technology

- BiotechPark with Innovation and Business Incubator
- 65 companies with 820 employees
Areas of focus: molecular biological diagnostic and therapeutic procedures, development of new drug therapies, drug delivery systems, B2B-service for the pharmaceuticals industry, research, and biotechnology, medical technology
- outstanding potential for cooperation with research and hospitals
- direct access to above mentioned international basic research and state-of-the-art technology platforms
- 31,000 m² of industry-specific laboratory and office space for start-ups and companies (laboratories up to security level 3); new start-up center "BerlinBioCube" opens in 2023 with additional 8,000 m² of laboratory and office space for start-ups in the life sciences; additional development space for companies: 9 ha
- Academy of the Life Science Learning Lab (continuing education)

Hospital Campus

Clinical expertise

- Three hospitals with more than 50 departments and institutes for maximum and specialised healthcare offer a total of approximately 1,250 beds and numerous certified centers: Helios Hospital Berlin-Buch, Evangelical Lung Clinic Berlin, Immanuel Hospital Berlin (specialists in rheumatology)
- 220,000 patients per year (both inpatient and outpatient) / 3,200 employees
- Training centre for the health professions (initial training, continuing education, and degree courses)
